6. Challenges and Issues...
to meet the research and development needs of the user.

4. To discuss about the various skills needed for the library professional in the emerging information environment which changes so rapidly and demands new strategies.

3. To define and explain the concept of library and provide an overview of the role of library professionals in this new environment.

2. To document the various changes and challenges faced by the library profession in the emerging environment.

1. To present the findings of this study in a manner that is easy to understand and explain the implications of these findings for library professionals and information providers.

Objectives

The objectives of this study are given below:

1. The primary objective of this study is to explore and explain the changing roles of library professionals in the emerging environment.

2. To determine the various changes and challenges faced by the library profession.

3. To define and explain the concept of library and provide an overview of the role of library professionals in this new environment.

4. To discuss about the various skills needed for the library professional in the emerging information environment which changes so rapidly and demands new strategies.

5. To present the findings of this study in a manner that is easy to understand and explain the implications of these findings for library professionals and information providers.

Opinions of the Future Public Library Professionals

The opinions of the Future Public Library Professionals are as follows:

1. The library profession must change to meet the demands of the emerging information environment.

2. Librarians must be educated in new skills and knowledge to meet the changing needs of the public.

3. Librarians must be able to adapt and change their roles to meet the changing needs of the public.

4. Librarians must be able to work with other professionals to meet the changing needs of the public.

5. Librarians must be able to use new technologies to meet the changing needs of the public.

6. Librarians must be able to work with other professionals to meet the changing needs of the public.

7. Librarians must be able to use new technologies to meet the changing needs of the public.

8. Librarians must be able to work with other professionals to meet the changing needs of the public.

9. Librarians must be able to use new technologies to meet the changing needs of the public.

10. Librarians must be able to work with other professionals to meet the changing needs of the public.
of Learning Environments in Information Centers

E-Learning/ Virtual Learning Environments in Information Centers

providing library service that is not only limited by the

library and its physical space, but also extends to

off library grounds. Enhanced library services are

possible as a result of the enhanced library services

offered through virtual learning environments.

The concept of a digital library is not

solely for academic libraries, but is also

applicable to public libraries, which can

provide a wider range of services.

Virtual Learning Environments

Library and Information Centers

This section will focus on the development of

virtual learning environments in library and

information centers. It will explore the role of

library and information centers in the context of

virtual learning environments.

Virtual learning environments can

enhance the learning experience by providing

interactive and engaging learning opportunities.

These environments allow learners to

engage with content in a more dynamic and

interactive way.

Virtual learning environments can also

facilitate personalized learning experiences

that cater to the individual needs of learners.

This is particularly important in library and

information centers, where learners may have

different levels of prior knowledge and

learning styles.

Virtual learning environments can

facilitate the development of critical thinking and

problem-solving skills.

Virtual learning environments can also

enhance collaboration and communication

among learners, allowing them to work

together on projects and assignments.

Virtual learning environments can

also provide access to a wide range of

resources, including books, articles, and videos.

These resources can be easily accessed and

shared within the virtual learning environment,

facilitating research and learning.

Virtual learning environments can

also be used to personalize learning experiences.

Libraries and information centers can

design virtual learning environments to

match the needs of different learner groups,

providing tailored learning experiences.

Virtual learning environments can

be used to enhance the library's role in

community engagement.

Libraries and information centers can

use virtual learning environments to

engage with the local community, providing

opportunities for learning and collaboration.

The use of virtual learning environments

in library and information centers can

enhance the learning experience for

learners and contribute to the overall

well-being of the community.

Virtual learning environments can

also provide support for lifelong learning.

Libraries and information centers can

use virtual learning environments to

facilitate lifelong learning, offering

opportunities for continuous learning and

professional development.

Virtual learning environments can

also be used to enhance the library's role in

community engagement.

Libraries and information centers can

use virtual learning environments to

engage with the local community, providing

opportunities for learning and collaboration.

The use of virtual learning environments

in library and information centers can

enhance the learning experience for

learners and contribute to the overall

well-being of the community.

Virtual learning environments can

also provide support for lifelong learning.

Libraries and information centers can

use virtual learning environments to

facilitate lifelong learning, offering

opportunities for continuous learning and

professional development.

Virtual learning environments can

also be used to enhance the library's role in

community engagement.

Libraries and information centers can

use virtual learning environments to

engage with the local community, providing

opportunities for learning and collaboration.

The use of virtual learning environments

in library and information centers can

enhance the learning experience for

learners and contribute to the overall

well-being of the community.

Virtual learning environments can

also provide support for lifelong learning.

Libraries and information centers can

use virtual learning environments to

facilitate lifelong learning, offering

opportunities for continuous learning and

professional development.

Virtual learning environments can

also be used to enhance the library's role in

community engagement.

Libraries and information centers can

use virtual learning environments to

engage with the local community, providing

opportunities for learning and collaboration.

The use of virtual learning environments

in library and information centers can

enhance the learning experience for

learners and contribute to the overall

well-being of the community.

Virtual learning environments can

also provide support for lifelong learning.

Libraries and information centers can

use virtual learning environments to

facilitate lifelong learning, offering

opportunities for continuous learning and

professional development.

Virtual learning environments can

also be used to enhance the library's role in

community engagement.

Libraries and information centers can

use virtual learning environments to

engage with the local community, providing

opportunities for learning and collaboration.

The use of virtual learning environments

in library and information centers can

enhance the learning experience for

learners and contribute to the overall

well-being of the community.

Virtual learning environments can

also provide support for lifelong learning.

Libraries and information centers can

use virtual learning environments to

facilitate lifelong learning, offering

opportunities for continuous learning and

professional development.

Virtual learning environments can

also be used to enhance the library's role in

community engagement.

Libraries and information centers can

learners and contribute to the overall

well-being of the community.

Virtual learning environments can

also provide support for lifelong learning.

Libraries and information centers can

use virtual learning environments to

facilitate lifelong learning, offering

opportunities for continuous learning and

professional development.
The New Creation of Learners

1. Lack of clarity in vision
2. Irrelevant or unclear of digital resources
3. Overload with non-relevant information
4. Technology deficiencies
5. Otherwise tight control and security
6. Unfavorable community governance
7. Opportunities for learners

New creation of learners

Facilitating access to digital information service to the knowledge society are the

digital libraries and information resources and professionals in the
government, industry, and academic fields. The digital libraries and
information resources should be considered as the key factor in
the development of the knowledge society.

Endnotes

1. Copyright in providing electronic information service in public
libraries.

2. Knowledge and information are the key factors in the
development of the knowledge society.
The modern trend is for the role of the public libraries to evolve into a new role in the digital age. With the rise of digital repositories, the libraries are expected to adapt and embrace new roles and responsibilities. The digital repositories have transformed the way information is shared, accessed, and managed. This has led to a shift in the role of the public libraries, moving from providers of information to facilitators of knowledge.

**Proactive, Proactive, Proactive.**

The proactive role of public libraries should be to anticipate and lead the way in the digital age. This requires a proactive approach to information management, where libraries must be proactive in gathering and disseminating information. This proactive role requires a proactive approach to information management, where libraries must be proactive in gathering and disseminating information.

**Leadership Role**

Leadership role involves the ability to influence and lead others in the direction of the library's mission. This includes the ability to set and achieve goals, make strategic decisions, and communicate effectively.

**Changing Roles of Future Public Library Professionals**

The changing roles of future public library professionals will be influenced by new technologies and changing user needs. This will require a proactive approach to information management, where libraries must be proactive in gathering and disseminating information.

**Conclusion**

The modern trend is for the role of the public libraries to evolve into a new role in the digital age. With the rise of digital repositories, the libraries are expected to adapt and embrace new roles and responsibilities. The digital repositories have transformed the way information is shared, accessed, and managed. This has led to a shift in the role of the public libraries, moving from providers of information to facilitators of knowledge.
The power and applicability of E-resources

The power and applicability of E-resources is mainly due to the ability of E-resources to facilitate learning, teaching, research, and other academic activities. E-resources can be accessed easily and quickly, providing access to a wide range of information at the touch of a button. This has made E-resources an integral part of modern education, research, and professional development. E-resources have revolutionized the way information is accessed and shared, making it easier for users to access and use valuable data and resources.

Providing a learning center to serve as a physical learning space

Design courses as part of multidisciplinary teams of experts to

Collaborative work in traditional ways or via Internet-based instruction

Teach Information literacy skills to current and future educators

Enhance and improve digital literacy and Internet safety

Section of core competencies for a graduate student

Develop effective informational literacy competencies as part of a program

The opportunities for libraries are numerous. Indeed, libraries

In recent years, there has been a growing interest in the use of E-resources in education. E-resources have been integrated into various educational programs, and their use has been encouraged by educators and researchers alike. E-resources are particularly useful in promoting lifelong learning, and they can be accessed from anywhere, at any time, and from any device.
